

CARE Checklist of information to include when writing a case report

Title 1 The diagnosis or intervention of primary focus followed by the words "case report".	Topic	Item	Checklist item description	Reported on Line
Abstract (no references) 3a Introduction: What is unique about this case and what does it add to the scientific literature?	Title	1	The diagnosis or intervention of primary focus followed by the words "case report"	/
(no references) 3b Main symptoms and/or important clinical findings 3c The main diagnoses, therapeutic interventions, and outcomes 3d Conclusion—What is the main "take-away" lesson(s) from this case? 4 One or two paragraphs summarizing why this case is unique (may include references) 5b De-identified patient specific information. 5b Primary concerns and symptoms of the patient. 5c Medical, family, and psycho-social history including relevant genetic information. 5d Relevant past interventions with outcomes. 5d Describe significant physical examination (PE) and important clinical findings. 7 Historical and current information from this episode of care organized as a timeline. 8d Diagnostic 8d Diagnostic challenges (such as PE, laboratory testing, imaging, surveys). 8d Prognosis (such as staging in oncology) where applicable. 7herapeutic part (historical intervention (such as pharmacologic, surgical, preventive, self-care). 9d Administration of therapeutic intervention (such as dosage, strength, duration). 9c Changes in therapeutic intervention (such as dosage, strength, duration). 9c Changes in therapeutic intervention (with rationale). 10c Important follow-up diagnostic and other test results. 10c Intervention adherence and tolerability (How was this assessed?). 10d Adverse and unanticipated events. 10c Intervention adherence and tolerability (How was this assessed?). 11d The scientific rationale for any conclusions (including assessment of possible causes). 11d The scientific rationale for any conclusions (including assessment of possible causes). 11d The primary Take-away' lessons of this case report (without references) in a one paragraph conclusion.	Key Words	2	2 to 5 key words that identify diagnoses or interventions in this case report, including "case report"	
The main equation important callingings 3c The main diagnoses, therapeutic interventions, and outcomes 3d Conclusion—What is the main "take-away" lesson(s) from this case? One or two paragraphs summarizing why this case is unique (may include references) Patient Information 5a De-identified patient specific information. 5b Primary concerns and symptoms of the patient. 5c Medical, family, and psycho-social history including relevant genetic information. 5d Relevant past interventions with outcomes. Clinical Findings 6 Describe significant physical examination (PE) and important clinical findings. Clinical Findings 7 Historical and current information from this episode of care organized as a timeline. Diagnostic testing (such as PE, laboratory testing, imaging, surveys). Assessment 8b Diagnostic challenges (such as access to testing, financial, or cultural). 8c Diagnosis (including other diagnoses considered). 4d Prognosis (such as staging in oncology) where applicable. Therapeutic 9a Types of therapeutic intervention (such as pharmacologic, surgical, preventive, self-care). Vertical Prognosis (such as taging in oncology) where applicable. Vertical Prognosis (such as taging in oncology) where applicable. Vertical Prognosis (such as taging in oncology) where applicable. Vertical Prognosis (such as taging in oncology) where applicable. Vertical Prognosis (such as taging in oncology) where applicable. Vertical Prognosis (such as dosage, strength, duration). Vertical Prognosis (such as taging in oncology) where applicable. Vertical Prognosis (such as dosage, strength, duration). Vertical Pro		3a	Introduction: What is unique about this case and what does it add to the scientific literature?	
Introduction 4 One or two paragraphs summarizing why this case is unique (may include references)	(no references)	3b	Main symptoms and/or important clinical findings	
Introduction 4 One or two paragraphs summarizing why this case is unique (may include references) 5a De-identified patient specific information. 5b Primary concerns and symptoms of the patient. 5c Medical, family, and psycho-social history including relevant genetic information. 5d Relevant past interventions with outcomes. 5d Relevant past intervention (PE) and important clinical findings. 5d Relevant past intervention from this episode of care organized as a timeline. 5d Diagnostic sand current information from this episode of care organized as a timeline. 5d Diagnostic (such as PE, laboratory testing, imaging, surveys). 5d Diagnostic challenges (such as access to testing, financial, or cultural). 5d Diagnostic (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as pharmacologic, surgical, preventive, self-care). 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis (such as staging in oncology) where applicable. 5d Prognosis		3с	The main diagnoses, therapeutic interventions, and outcomes	
Patient Information 5a De-identified patient specific information. 5b Primary concerns and symptoms of the patient. 5c Medical, family, and psycho-social history including relevant genetic information. 5d Relevant past interventions with outcomes. Clinical Findings 6 Describe significant physical examination (PE) and important clinical findings. 7 Historical and current information from this episode of care organized as a timeline. Diagnostic 8a Diagnostic (testing (such as PE, laboratory testing, imaging, surveys). 8b Diagnostic challenges (such as access to testing, financial, or cultural). 8c Diagnosis (including other diagnoses considered). 8d Prognosis (such as staging in oncology) where applicable. 7 Types of therapeutic intervention (such as pharmacologic, surgical, preventive, self-care). 9b Administration of therapeutic intervention (such as dosage, strength, duration). 9c Changes in therapeutic intervention (with rationale). Follow-up and Outcomes 10a Clinician and patient-assessed outcomes (if available). 10b Important follow-up diagnostic and other test results. 10c Intervention adherence and tolerability (How was this assessed?). 10d Adverse and unanticipated events. 11d A scientific discussion of the strengths AND limitations associated with this case report. 11d The scientific rationale for any conclusions (including assessment of possible causes). 11d The primary 'take-away' lessons of this case report (without references) in a one paragraph conclusion.		3d	Conclusion—What is the main "take-away" lesson(s) from this case?	
Sb	Introduction	4	One or two paragraphs summarizing why this case is unique (may include references)	
Sc Medical, family, and psycho-social history including relevant genetic information Findings Relevant past interventions with outcomes. Clinical Findings 6 Describe significant physical examination (PE) and important clinical findings. V Historical and current information from this episode of care organized as a timeline. V Diagnostic 8a Diagnostic testing (such as PE, laboratory testing, imaging, surveys). 8b Diagnostic challenges (such as access to testing, financial, or cultural). 8c Diagnosis (including other diagnoses considered). 8d Prognosis (such as staging in oncology) where applicable. Therapeutic 9a Types of therapeutic intervention (such as pharmacologic, surgical, preventive, self-care). 9b Administration of therapeutic intervention (such as dosage, strength, duration). 9c Changes in therapeutic intervention (with rationale). Follow-up and 10a Clinician and patient-assessed outcomes (if available). 10b Important follow-up diagnostic and other test results. 10c Intervention adherence and tolerability (How was this assessed?). 10d Adverse and unanticipated events. 11d A scientific discussion of the strengths AND limitations associated with this case report. 11d The scientific rationale for any conclusions (including assessment of possible causes). V Patient Perspective 12 The patient should share their perspective in one to two paragraphs on the treatment(s) they received.	Patient Information	5a	De-identified patient specific information
